

Integrated Systems

INDUSTRIAL SYSTEMS

Industrial systems is the cornerstone of our organization. Our broad expertise in applying machine control as well as automation solutions is the key to understanding your requirements and providing solutions that fulfill those requirements.

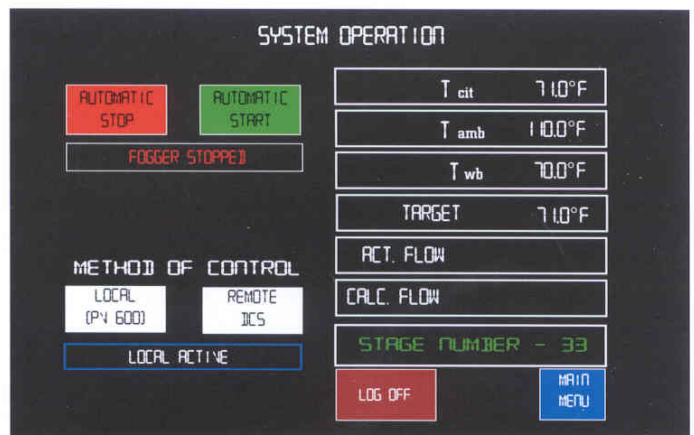

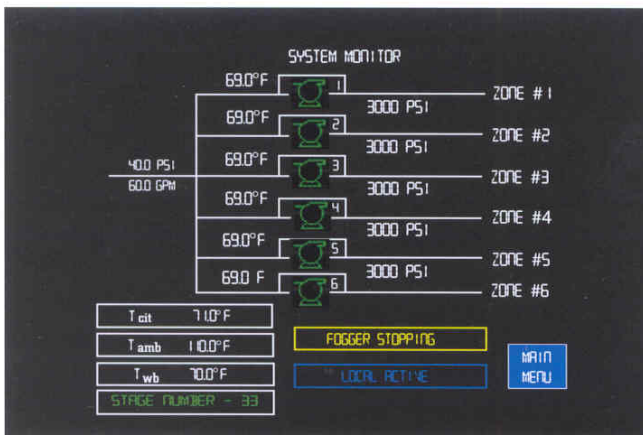

Skid Mounted System

PROJECT MANAGEMENT & PROCESS EXPERIENCE

Total account responsibility is critical to the success of any project. To insure this, a project manager is assigned to your account immediately upon receipt of an opportunity. A plan is developed to insure that there is coordination within our organization and with our suppliers to meet the project requirements. From preliminary analysis through commissioning, everyone in the organization takes responsibility and ownership of their part of the project.

Our engineering team has a wide background of experience to draw from. Each member of the team brings product/process diversity that when combined will provide the most efficient solution to your automation problem.

PANEL FABRICATION

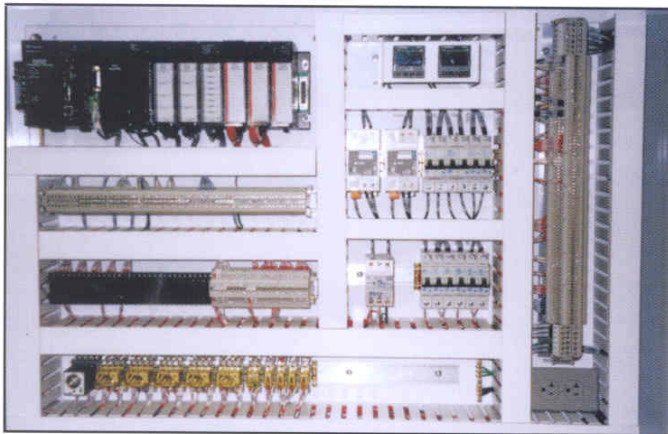

Fabrication services from AMCO are a valuable tool for any business. Our fabrication services become an extension of your company. Whether you provide us with all of the material and drawings or we supply everything, AMCO will build a quality panel for you at competitive rates. Whether your goal is to level out the workload of a manufacturing shop, or to add value to a customer account, the flexibility you have in utilizing our fabrication services guarantees total satisfaction. These are some examples of products that may be produced more cost-effectively by utilizing our fabrication services:

- UL Panels
- Operator Interface Stations
- Terminal and Junction Boxes
- Control Sub-Assemblies
- Motor and Drive Control Cabinets

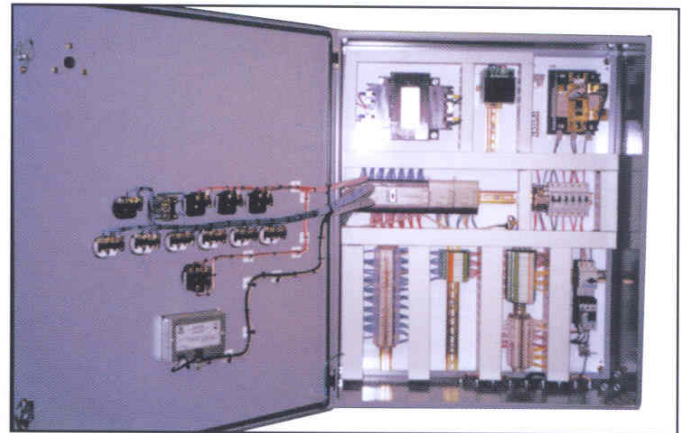

AMCO Facility

- Machine Control Panels
- Programmable Control Panels
- Product Assembly
 - Full Turn-Key Service
 - Full Product or Subassembly

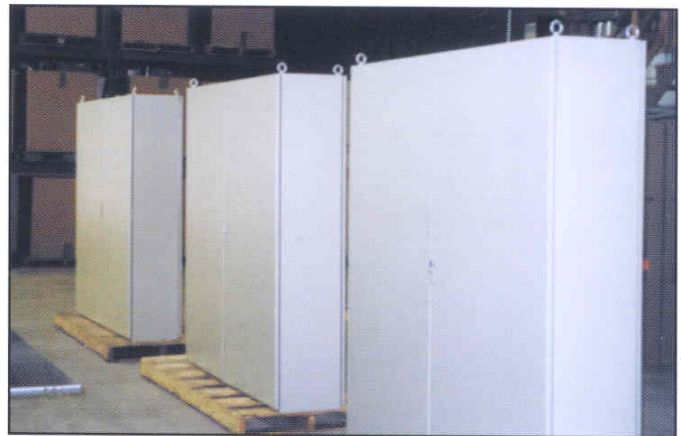

PLC Panel

Control Panel

We can provide quality assembly to your specifications with the parts you require. Assemblies can also be tested and stocked for 'Just-In-Time' delivery.

As a UL listed panel assembler, we have a wide range of products listed in our UL File or we can obtain UL approval for other parts you require. We have a documented quality program to assure that we meet or exceed your quality requirements.
